4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Yes

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

No - No New Anchors

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.

Midwest Energy Cooperative d/b/a Midwest Connections

Line 510 – Description of Compliance with Service Quality Standards and Consumer Protection

Rule 54.313(a)(5)

Midwest Energy Cooperative d/b/a Midwest Connections (“Midwest”) follows applicable federal and state service quality and consumer protection rules. Midwest complies with quality of service requirements including monitoring and reporting service quality metrics where required. Midwest monitors its service quality on a regular basis, and continually strives to ensure a high level of service is provided to Midwest’s customers.

Midwest certifies that it complies with all applicable FCC and Michigan consumer protection rules, including those rules codified in Sections 505 and 507 of the Michigan Telecommunications Act, MCL 484.2505 and MCL 484.2507. Midwest implemented numerous consumer protection measures to protect customer information. For example, Midwest’s Customer Proprietary Network Information (CPNI) policies and procedures are consistent with the FCC’s regulations. Employees are required to complete CPNI training and employees who have access to CPNI data receive additional guidance through written procedures regarding customer authentication. Annually, all employees are required to review Midwest’s Business Code of Conduct which includes information and requirements for protecting sensitive customer information from improper use and disclosure. Midwest’s privacy and security policies are reinforced through periodic training required of all employees. Additional consumer protection measures include Midwest’s use of a third –party verifier to prevent unauthorized presubscribed interexchange carrier (PIC) changes (“Slamming”) and the fact that there are no billing and collection arrangements that could potentially allow unauthorized third-party charges to be added to customer’s bills (“Cramming”). Midwest files an annual report with the FCC certifying its compliance with the FCC’s CPNI rules.

Midwest Energy Cooperative d/b/a Midwest Connections

Line 610 – Description of Functionality in Emergency Situations

Rule 54.313(a)(6)

Company is able to remain functional in an emergency situation through the use of back-up power to ensure functionality without an external power source. The Company's standard for battery backup is 4 hours in offices with a generator. This is ensured during annual routine maintenance which includes battery inspection, cleaning, documentation of float voltage and cell temperature, as well as equalization or replacement if necessary. . Also, portable generators are available for deployment to remote hubs without permanent generators. The Company's network is engineered to provide maximum capacity in order to handle excess traffic in the event of traffic spikes resulting from emergency situations. Company facilities are remotely monitored and managed by a centralized Network Operations Center which is staffed 24 x 7, 365 days a year. Technicians are able to remotely access and respond to alarm conditions. By design, transport redundancy is built into the telephony and data network on many levels and in the event of a hardware or circuit failure or traffic spike, the networks are able to self-correct in many cases or, at many locations, technicians are able to manually switch network elements to standby facilities both locally and remotely.
